PROFESSIONAL SUMMARY

I'm a computer science student currently pursuing my postgraduation, with a strong interest in building real-world projects. Over the last couple of months, I've worked on full-stack applications that helped me understand both frontend and backend development in depth. I'm someone who enjoys taking part in tech events and competitions, and I always try to apply what I learn in class to practical projects. Learning by doing is something I believe in, and I'm always exploring new ways to improve and grow as a developer.
